

## Flex-A-Bed Accessories and Custom Orders

**Some customers prefer their Flex-A-Bed a little higher off the floor. Others ask for an easier way to change the sheets. Whatever your customers' needs or requests, Flex-A-Bed can most likely accommodate them.**

That's because we make every bed by hand in our LaFayette, Georgia factory. So not only do you get excellent craftsmanship, you have a partner who can add just the right accessory or specification to satisfy your customer.

Call us at **1-800-421-2277** to talk about any special customer request. We'll work to give you a happy customer for life.

### **Timed Massage**

Add a single or dual timed massage unit to any Flex-A-Bed Premier for the perfect night's sleep. Single massage is also available for the Value-Flex Model by special request.

### **Side Rails**

Side rails make getting in and out of bed easier while providing added security while sleeping. Side rails easily fold away when not in use.

### **Leg Extensions**

To ensure easy entry and exit from the bed, leg extensions can be added to adjust the height of the mattress from the floor anywhere from 24 to 30 inches.

### **Lower Bed Heights**

When needed, we can lower the height of any Premier or Value-Flex by up to 4 inches. The Hi-Low Model can be lowered up to 2 inches.

### **Swingaway Brackets**

Swingaway brackets create a hinge between our headboard bracket and your customer's headboard for easier cleaning or changing of sheets.

### **Dual Bed Brackets**

Brackets for Dual King or Queen beds can easily be added to prevent dual beds from drifting apart.

### **Reinforced Bed Frames**

Our reinforced bed frames are manufactured with six legs for extra support, double steel in the frame and lift arms for added strength, and Flex-A-Bed's heavy-duty motors for reliable operation.

### **Custom Fitted Sheets**

White, poly/cotton, 200-thread count, fitted sheets designed exclusively to fit our twin and full-size beds. These hard-to-find premium sheets fit most other manufacturers' beds as well.
